- 1.** Residential Agriculture (R-A)
- 2.** Single-Family Residential (R-1)
- 3.** Two-Family Residential (R-2)
- 4.** Multi-Family Residential (R-3)
- 5.** Residential Business (R-B)

  - (e)** T-6
  - (f)** SD-WH
  - (g)** SD

### **B. Sub-districts**

- 1.** Sub-district regulations provide standards to allow development compatible with existing neighborhoods in order to enhance and protect the established character of traditional or environmentally sensitive communities. Sub-districts created by this Chapter are as follows and are shown on the Zoning Map of the City of Mobile:
  - (a)** Urban. Areas generally developed prior to 1950, historically with smaller lots sizes, proximity to street car service, with a walkable development pattern based on a grid, and generally located within or near a federally or locally designated historic district.
  - (b)** Suburban. Areas generally developed after 1950, typically with larger lot sizes; the development pattern is not based on a grid. Larger footprint commercial buildings with large parking lots as a focus are typical of suburban development.

## **Article 2 Zoning Districts**

- (c)** Conservation. A type of development pattern that is focused on preserving environmental elements associated with the site; including wetlands, flood zones and other environmentally sensitive features.

### **C. Area plans**

- 1.** Area plans provide specific policies that reflect the unique character of neighborhoods defined within the corresponding plan. These regulations supplement and, in certain circumstances, will supersede the base zoning regulations established in this Chapter to reflect specific considerations for the following neighborhoods:
  - (a)** Africatown (see Article 11)
  - (b)** Peninsula (see Article 12)
  - (c)** Village of Spring Hill (see Article 13)
  - (d)** Historic District Overlay (HDO) (see Article 14)

### **D. Future Land Use Map Applicability**

- 1.** The Future Land Use Map (FLUM) is a general guide for the establishment of zoning districts. An applicability statement based upon the Zoning District Correspondence Matrix from the Map for Mobile Future Land Use Plan and Major Street Plan document, adopted in 2017, may be found for each zoning district defined by this Section. It should be noted that the FLUM is a general guide, not a mandate for development. As the FLUM is a general guide, any zoning district may be considered for a location where the district does not correspond with the FLUM.

## Sec. 64-2-2 Zoning Map

- A. The City will maintain a digital zoning map which will show the location and boundaries of the zoning districts, sub-districts, and area plans. The digital map will be maintained to accurately reflect the most recently adopted zoning ordinances, rulings and decisions impacting the permitted uses of property located within the City limits.

## Sec. 64-2-3 Zoning of Annexed Land

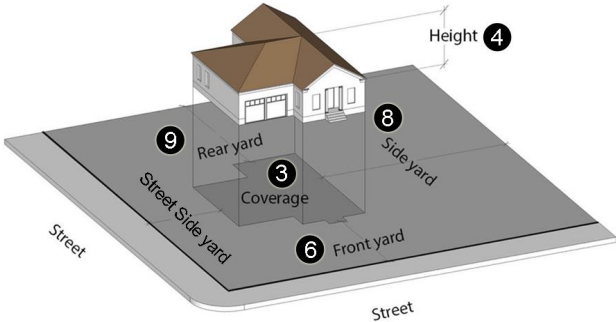

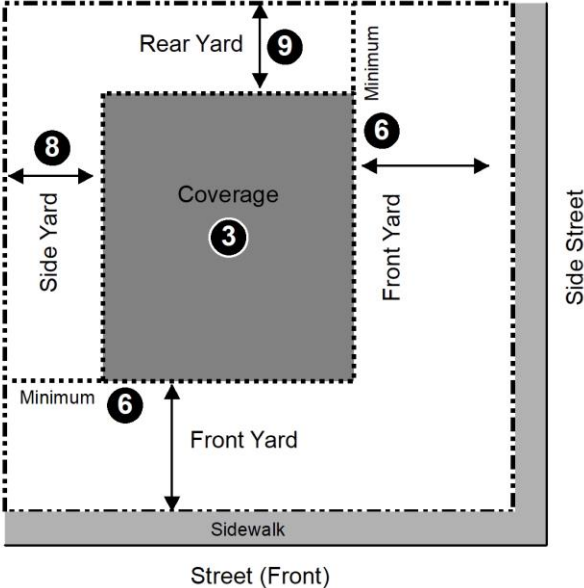

- A. All territory that is annexed to the City of Mobile is automatically assigned the “R-1 Single-Family Residential” district until existing land uses are determined and a new zoning category is adopted.
- B. In lieu of the “R-1, Single-Family Residential” district, the Applicant for annexation may request pre-zoning pursuant to Code of Alabama § 11-52-85.

## Sec. 64-2-4 Residential Agriculture(R-A)

- A. Generally. These districts are composed of larger tracts of land that are vacant or in agricultural, forest, or single-family residential uses. It is intended that these districts provide for a full range of agricultural and farming activities and protect these established uses from encroaching development. The farmer has a right to farm without being restricted by neighboring residential districts or nonagricultural uses. It is further intended that the districts protect existing natural resources and scenic values and provide a spacious residential environment for residents of the community.
- B. FLUM applicability. The FLUM does not indicate a specific land use category as suitable for new R-A districts. It is recommended that the following FLUM categories be considered as suitable for location of new R-A districts.
1. Low Density Residential
  2. Parks & Open Space
  3. Water Dependent Uses
- C. Overlay Applicability. New R-A districts may be considered for location within the following Overlay:
1. Peninsula
- D. Permitted Uses. See the Use Table (Sec. 64-2-24.1).

The developed areas contain mainly one-family dwellings and small open areas, usually subdivided, where residential development seems likely to occur; few two-family and multiple-family dwellings are found in these developed areas. It is anticipated that most of the large undeveloped areas will ultimately be developed for residential use. The district regulations are designed to protect the residential character of the developed areas by prohibiting commercial activities and encouraging a suitable neighborhood environment for family life.
- B. FLUM Applicability. New R-1 districts may be considered for location within the following FLUM categories:
1. Low Density Residential (R-1 Suburban and Conservation)
  2. Neighborhood Center – Traditional (R-1 Urban and Suburban)

## Sec. 64-2-6 Two-Family Residential (R-2)

- A. Generally. These districts are composed mainly of areas containing a mixture of one-family and two-family dwellings and open areas where similar residential development seems likely to occur. The district regulations are designed to protect the residential character of the developed areas by prohibiting commercial activities and encouraging a suitable neighborhood environment for family life.

## Sec. 64-2-7 Multi-Family Residential (R-3)

- A. Generally. These districts are composed mainly of areas containing a mixture of one-family, two-family, and multiple-family dwellings. The district regulations are designed to protect the residential character of the developed areas by prohibiting commercial activities, encouraging a suitable neighborhood environment for family life and to avoid excessive population density by requiring a minimum building site area and establishing a maximum number of dwelling units per acre.
- B. FLUM Applicability. New R-3 districts may be considered for location within the following FLUM categories:
1. Low Density Residential (R-3 Suburban)
  2. Mixed Density Residential (R-3 Urban and Suburban)

## Sec. 64-2-9 Historic Business (H-B)

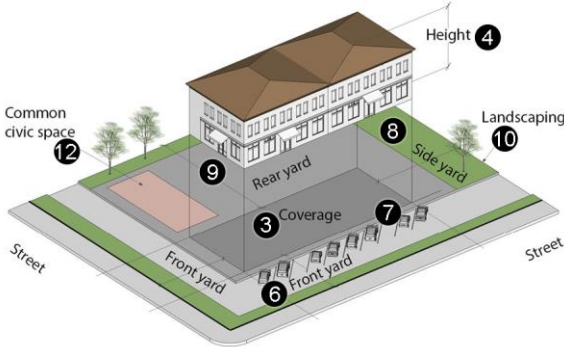

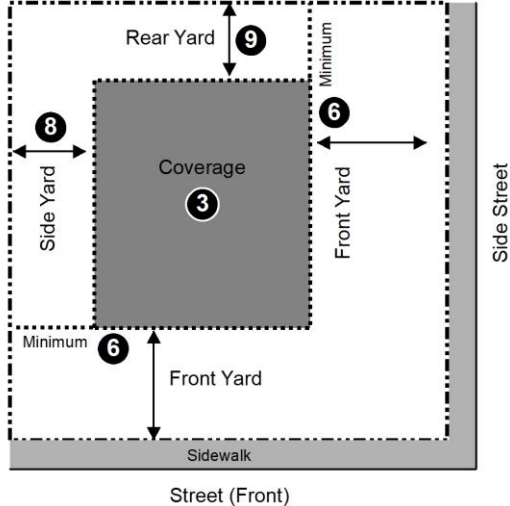

- A. Generally. These districts are composed of areas containing architecturally or historically valuable buildings. By reason of location and accessibility, the districts are suitable for residences as well as specialty shopping and entertainment activities for tourist and local trade. The district regulations are designed to protect the special character of the areas, to encourage restoration of architecturally and historically valuable buildings and their adaptation to house permitted uses and to encourage further appropriate development for a limited number of mutually supporting light business and cultural uses.
- B. FLUM Applicability. New H-B districts may be considered for location within the following FLUM categories:
1. Downtown

## Sec. 64-2-10 Buffer Business (B-1)

- A. Generally. These districts are composed of land and structures occupied by or suitable for such uses as residential, offices and parking. Although usually located between residential areas and business areas, these districts are in some instances free-standing in residential areas or they may include hospital, college or other public or semipublic groups and related uses. The district regulations are designed to protect and encourage the buffer character of the districts by limiting the permitted uses to dwellings and uses of a semicommercial nature and to protect the abutting and surrounding residential areas by requiring certain minimum yard and area standards to be met, standards that are comparable to those called for in the residence districts.
- B. FLUM Applicability. New B-1 districts may be considered for location within the following FLUM categories:
1. Neighborhood Center – Suburban (B-1 Suburban)
  2. Traditional Corridor (B-1 Urban)
  3. Mixed Commercial Corridor (B-1 Urban and Suburban)

11	Common Open Space per dwelling unit	Not Applicable	Not Applicable
12	Common Civic Space ( <i>minimum</i> )	4%	Not Applicable

## Sec. 64-2-11 Transitional Business (T-B)

- A. Generally. These districts are intended for small sites in or near dense residential neighborhoods on, at or near a thoroughfare. The district regulations encourage the provision of small-scale retail and service uses for nearby residential areas, as well as mixed use development. Some uses that are not retail or service in nature are also allowed so a variety of uses may locate in existing buildings. Uses are restricted in size, number and character to promote a local orientation and to limit adverse impacts on nearby residential areas. Development is intended to be pedestrian-oriented and compatible with the scale of surrounding residential areas. Parking areas are restricted, since their appearance is generally out of character with the surrounding residential development and the desired orientation of the uses.
- B. FLUM Applicability. New T-B districts may be considered for location within the following FLUM categories:
1. Mixed Density Residential
  2. District Center
  3. Neighborhood Center – Traditional
  4. Neighborhood Center – Suburban
  5. Traditional Corridor
- C. Overlay Applicability. New T-B districts may be considered for location within the following overlays:

## **Sec. 64-2-12 Limited Neighborhood Business District (LB-2)**

- A. Generally. These districts are composed of land and structures occupied by or suitable for furnishing retail goods, such as groceries and drugs, and services, such as barbering and shoe repairing, to satisfy the daily household needs of the surrounding residential neighborhoods, as well as allowing mixed use development. Locational guidelines for LB-2 districts are the same as for B-2 districts. Often located on a thoroughfare or near the intersection of two (2) thoroughfares, these districts are small and are within convenient walking distance of most of the areas they will serve. The district regulations are designed to permit the development of the districts for their purpose and to protect the abutting and surrounding residential areas by prohibiting certain commercial uses such as bars and liquor stores and requiring certain minimum yard and area standards to be met with standards that are comparable to those called for in residential districts. LB-2 does not supplant or replace B-1, but is another option for certain permitted uses in lieu of B-2.
- B. FLUM Applicability. New LB-2 districts may be considered for location within the following FLUM categories:
1. Mixed Density Residential (LB-2 Urban and Suburban)
  2. Neighborhood Center – Suburban (LB-2 Suburban)

## Sec. 64-2-14 Community Business (B-3)

- A. Generally. These districts are composed of land and structures used to furnish, in addition to the retail goods and services found in neighborhood business districts, such less frequently needed goods as clothing and automobiles—the wider range of retail goods and services to satisfy all the household and personal needs of the residents of a group or community of neighborhoods, as well as allowing mixed use development. Light or heavy distribution uses may be allowed as defined in the chart of permitted uses. Usually located on a thoroughfare or near the intersection of two (2) thoroughfares, these districts are large and are within convenient driving distance of the group of neighborhoods they will serve. The district regulations are designed to permit the development of the districts for their purpose in a spacious arrangement and to protect the abutting and surrounding residential areas certain restrictions are placed on uses.
- B. FLUM Applicability. New B-3 districts may be considered for location within the following FLUM categories:
1. District Center (B-3 Urban)

The Director may refer to empirical studies or generally accepted planning or engineering sources in making this determination. The burden is on the Applicant to establish that the use is similar to the expressly listed use, or</li> <li>• Whether the use is within the same industry classification as another permitted use. In making this determination, the Administrator may refer to the most recent edition of the <i>North American Industry Classification Manual</i> (Executive Office of the President, Office of Management and Budget, 2017) ("NAICS"). If the use is not defined in the NAICS, the Administrator may refer to the American Planning Association, <i>Land-Based Classification Standards LBCS Tables</i> (April 1, 2001).</li> <li>• The Director's decision is appealable to the Board of Zoning Adjustment (see Article 5).</li> </ul>
